

WE'RE LOOKING FOR THE NEXT GENERATION OF PHILANTHROPISTS: YOU.

You want to make a difference at SickKids. But for you, this is more than a decision to donate – it's a desire to be involved. You want to be front-and-centre in deciding where your donation will go, and what impact it will make. Engaged, active philanthropy: it's what SickKids Innovators do. Join us.

Innovators  VS Impossible

WHAT DOES A SICKKIDS INNOVATOR DO?

COMMIT: to investing a minimum of \$5,000 per year for two years.

ENGAGE: events throughout the year will inspire, inform and empower you. You'll go behind the scenes at SickKids, where researchers and clinical leaders will update you on the hospital's highest priorities.

DECIDE: each November, top doctors and researchers pitch the group on under-funded, high-priority projects. You vote on which to support.

WHY SICKKIDS?

SickKids is the hospital where medical advances make the most difference in people's lives – at the beginning. So your impact will be big. So far, Innovators have donated over \$1.5 million to priorities like the Neonatal Intensive Care Unit (NICU), genetic medicine, and our global health initiatives.

WHY BE AN INNOVATOR?

OWN: a research or clinical initiative - one entirely funded by Innovators. Your personal investment is pooled with the collective to make a substantial, meaningful difference.

IMPACT: at the end of each year, you'll hear from the physician or researcher leading the selected project on what was accomplished through your investment.

ACCESS: to insider information – you'll hear from world-class doctors, researchers and medical leaders on breakthroughs and discoveries through behind-the-scenes opportunities.

NETWORK: with a diverse group of like-minded business and community leaders.

JOIN US.
